ORDERING INFORMATION

All Mopar® vehicle care and maintenance products may be ordered via the normal Mopar Parts ordering functions on DealerCONNECT.

Mopar vehicle care and maintenance products are stocked at Mopar Parts Distribution Centers (PDC).

DEPARTMENT OF TRANSPORTATION REQUIREMENTS

The U.S. Department of Transportation (DOT) strictly regulates the packaging, labeling and shipping of hazardous materials that are transported via ground or air. Particular restrictions are placed on hazardous materials that can be shipped via air. DOT federal regulations found at 49 CFR Part 172 Subpart H provide that you or your employees are required to receive INITIAL (within 90 days of beginning employment) and RECURRING (minimum of at least once every 3 years) hazardous materials training IF you meet the following criteria:

- If you or any employee ever work in an area involved with the shipping or receiving of hazardous materials or work in the hazardous materials handling area
- If you or any employee are ever involved in any aspect of transporting hazardous materials by ground or air
- If you or any employee are involved with preparing hazardous materials for transport

Mopar recognizes that hazardous materials pose a risk to health, safety and the environment when being transported. Mopar strictly complies with all DOT Hazardous Materials Regulations (HMR) to ensure both a high level of security and employee safety when shipping our products. Mopar's commitment to HMR compliance includes providing the appropriate packaging and labeling to ensure proper shipping of our products.

It is important that you understand your responsibilities as an employer/shipper and the consequences of failing to comply with federal DOT Hazardous Materials Regulations when shipping or returning vehicle parts and maintenance products to Mopar. By strictly adhering to HMR requirements, you will be able to safely and properly ship any returned parts or maintenance products to Mopar.

For more information on compliance requirements, please visit the DOT Web site at: <http://hazmat.dot.gov>.

MATERIAL SAFETY DATA SHEETS

The Federal Hazard Communication Standard and many state regulations require that Material Safety Data Sheets (MSDS) be readily available for all applicable products to users of those products. The MSDS provides detailed health, handling and safety information on the particular product.

DealerCONNECT ACCESS TO MATERIAL SAFETY DATA SHEETS

DealerCONNECT Interactive Access to Material Safety Data Sheets (MSDS) allows for quick and easy retrieval of an MSDS for any potentially hazardous part. The following procedure is designed to guide you through the basic steps for interactively accessing a Material Safety Data Sheet (MSDS) through DealerCONNECT.

3. From the DealerCONNECT homepage, click on the **[PARTS]** tab.
4. From the Parts page, click on the **[MSDS]** link under the Reference Library.
5. Type in the Part Number on the MSDS inquiry screen and click on the **[SEARCH]** key.
6. Select the appropriate product and click on the **[DISPLAY MSDS]** key.
